

International Seafood Supplier

product catalog

About Freezco

Business profile: Salmon segment is the most important area of activity in our company. It is managed from direct purchase of raw material from farmers, through outsourcing of processing, to the sale of products on retail, food service or B2B markets. **White fish and seafood segment** includes purchasing trade goods from Europe, Asia and America – the dominant role here is played by cod, saithe and shrimp.

Wide product range: We offer fresh, frozen and canned fish and seafood (over 30 species, almost 400 SKU). We are constantly expanding our offer with new species in accordance with current market trends.

World-oriented: Our presence worldwide proves a high level of quality of our work and shows our good knowledge about rules in the international market as well as demonstrates our flexibility. We take a great pride in the fulfillment of our orders to over 100 customers spread throughout 30 countries of Europe and Asia such as France, Germany, Italy, United Kingdom, Austria, Hungary, Israel, Japan, Singapore, United Arab Emirates and many more.

Expertise: Our team, experienced in international seafood market, combines deep knowledge of fish processing with proven skills in the scope of raw material purchasing and understanding of needs and expectations of clients. All these lead to taking full responsibility for preparing and supplying with perfect final products. **Currently, the team consists of 30 people.**

Full logistics: Freezco products can be prepared under our or customer's brand and are delivered directly to the given address. We organize the whole logistics according to our partners' expectations.

Certifications: As a responsible fish player we are proud to be regularly checked and certified. Our processors do the same. As a result we offer you products with a wide range of certifications: **GlobalG.A.P., MSC, ASC, BIO** and we operate in accordance with **IFS Broker**.

12 specialized plants: Each plant has its speciality - excels in smoked, fresh, frozen or canned products. That is why we process fish in different areas in Poland and Baltic countries, adjusting it to our clients' needs.

Aquaculture & fishery certified products

Certified products of aquaculture and fishery

Specialized brand, devoted to fish and seafood.

Comprehensive offer: fresh, frozen, smoked, preserves

Packaging based on recycled materials

Better Fish is a specialized brand, devoted to fish and seafood, which offers the widest range of certified aquaculture and fishery products in Poland. Better Fish products are made on the basis of raw materials originating from BIO or MSC (Marine Stewardship Council) certified sources.

High quality of products is guaranteed by certified raw material coming from verified suppliers as well as by efficient production process based on traditional solutions.

BIO certification guarantees a high level of quality of a product made without GMO and antibiotics. MSC standard proves that fish come from stable, well-managed fisheries. MSC certificate is an equivalent of BIO certificate for wild fish, not farmed.
